

Project title: Import Data Using Transform Maps

Phase 3: Project Design Phase

1. System Architecture and Conceptual Data Flow

The architectural workflow tracks the data as it moves from an unformatted external file into a fully secure, visually charted enterprise database.

Excel Spreadsheet Source Payload Data

-> System Import Sets Module (Load Data)

-> Intermediate Staging Table (u_employee_import)

-> Transform Map Engine Layout Configuration (Enforced Security Filter: Coalesce == True)

-> Decision Loop: IF Employee ID Matches Trigger Record UPDATE / IF Employee ID Is New Trigger Record INSERT

-> Core System Target Custom Table (u_employee_test)

-> Platform Reporting and Graphics Engine

-> Centralized Interactive Executive Dashboard Layout Workspace.

2. Granular Database Schema Layout (Data Model)

The custom target tracking infrastructure utilizes a custom application table designed specifically to hold validated user information.

Target Table Label: Employee Test

Target Table Backend Name: u_employee_test

Employee ID (u_employee_id): String Type, 40 Length, Coalesce = True (Primary Lookup Key)

Employee Name (u_employee_name): String Type, 100 Length, Standard Informational Attribute

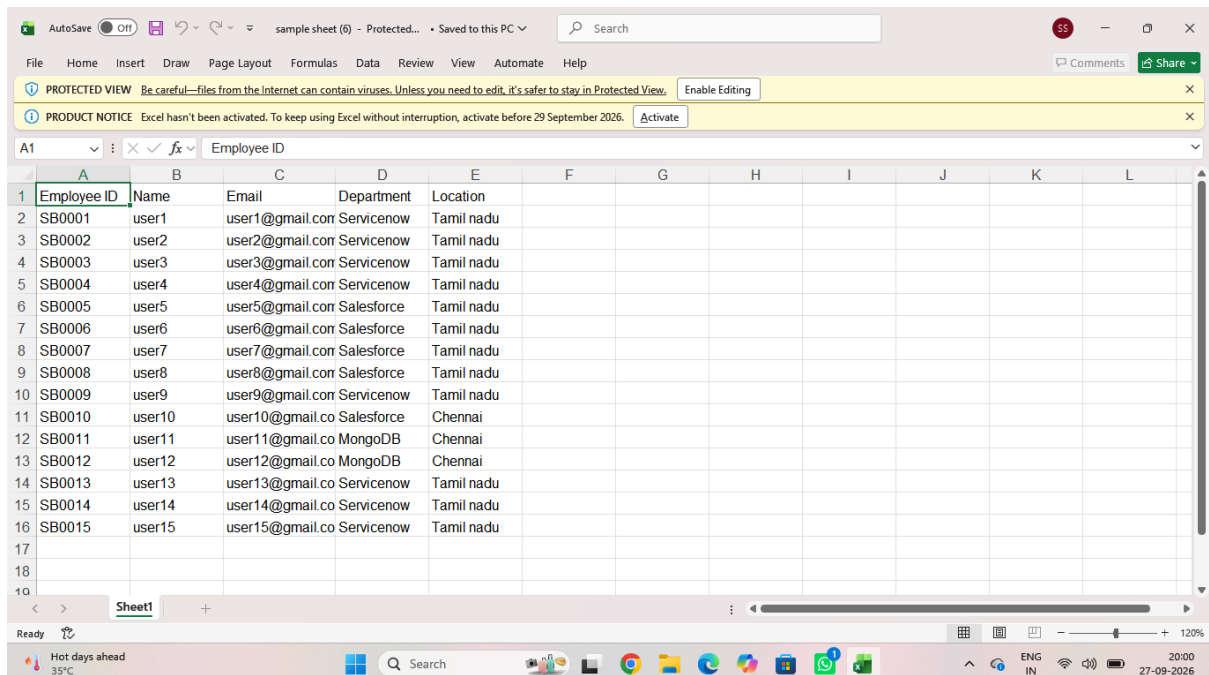

Email Address (u_email): String Type, 100 Length, Standard Informational Attribute

Department (u_department): String Type, 40 Length, Operational Categorization Key

Geographic Location (u_location): String Type, 40 Length, Operational Categorization Key

3. Database Design Layout Screenshots Verification

Below are the design confirmations extracted directly from the system backend interface:

The screenshot displays an Excel spreadsheet titled 'sample sheet (6) - Protected...'. The spreadsheet contains a table with 15 rows of employee data. The columns are labeled A through L, with the first five columns (A-E) containing the data. The data is as follows:

Employee ID	Name	Email	Department	Location
SB0001	user1	user1@gmail.com	Servicenow	Tamil nadu
SB0002	user2	user2@gmail.com	Servicenow	Tamil nadu
SB0003	user3	user3@gmail.com	Servicenow	Tamil nadu
SB0004	user4	user4@gmail.com	Servicenow	Tamil nadu
SB0005	user5	user5@gmail.com	Salesforce	Tamil nadu
SB0006	user6	user6@gmail.com	Salesforce	Tamil nadu
SB0007	user7	user7@gmail.com	Salesforce	Tamil nadu
SB0008	user8	user8@gmail.com	Salesforce	Tamil nadu
SB0009	user9	user9@gmail.com	Servicenow	Tamil nadu
SB0010	user10	user10@gmail.co	Salesforce	Chennai
SB0011	user11	user11@gmail.co	MongoDB	Chennai
SB0012	user12	user12@gmail.co	MongoDB	Chennai
SB0013	user13	user13@gmail.co	Servicenow	Tamil nadu
SB0014	user14	user14@gmail.co	Servicenow	Tamil nadu
SB0015	user15	user15@gmail.co	Servicenow	Tamil nadu
